

THE WRAPPER INTRODUCES PROBLEMS OF ITS OWN

- ▶ This is what we have in the page by default
- ▶ Then we scroll...
- ▶ And the bars come into view

```
wrapper.onScroll(scrollPos => {  
  if (scrollPos > chartThreshold) {  
    Chart.animate();  
  }  
});
```

THE WRAPPER INTRODUCES PROBLEMS OF ITS OWN

- ▶ But what if we can't detect scroll?
- ▶ **This is all we'd see** all the time! >

```
wrapper.onScroll(scrollPos => {  
  if (scrollPos > chartThreshold) {  
    Chart.animate();  
  }  
});
```
