

FIXING FULL-SCREEN MODE – PUTTING IT TOGETHER

```
● ● ●  
  
// host page  
window.addEventListener('message', function () {  
    if (event.data.name === 'window:toggleFullScreen') {  
        document.getElementById(iframeUid).className += ' fullscreen';  
    }  
});
```

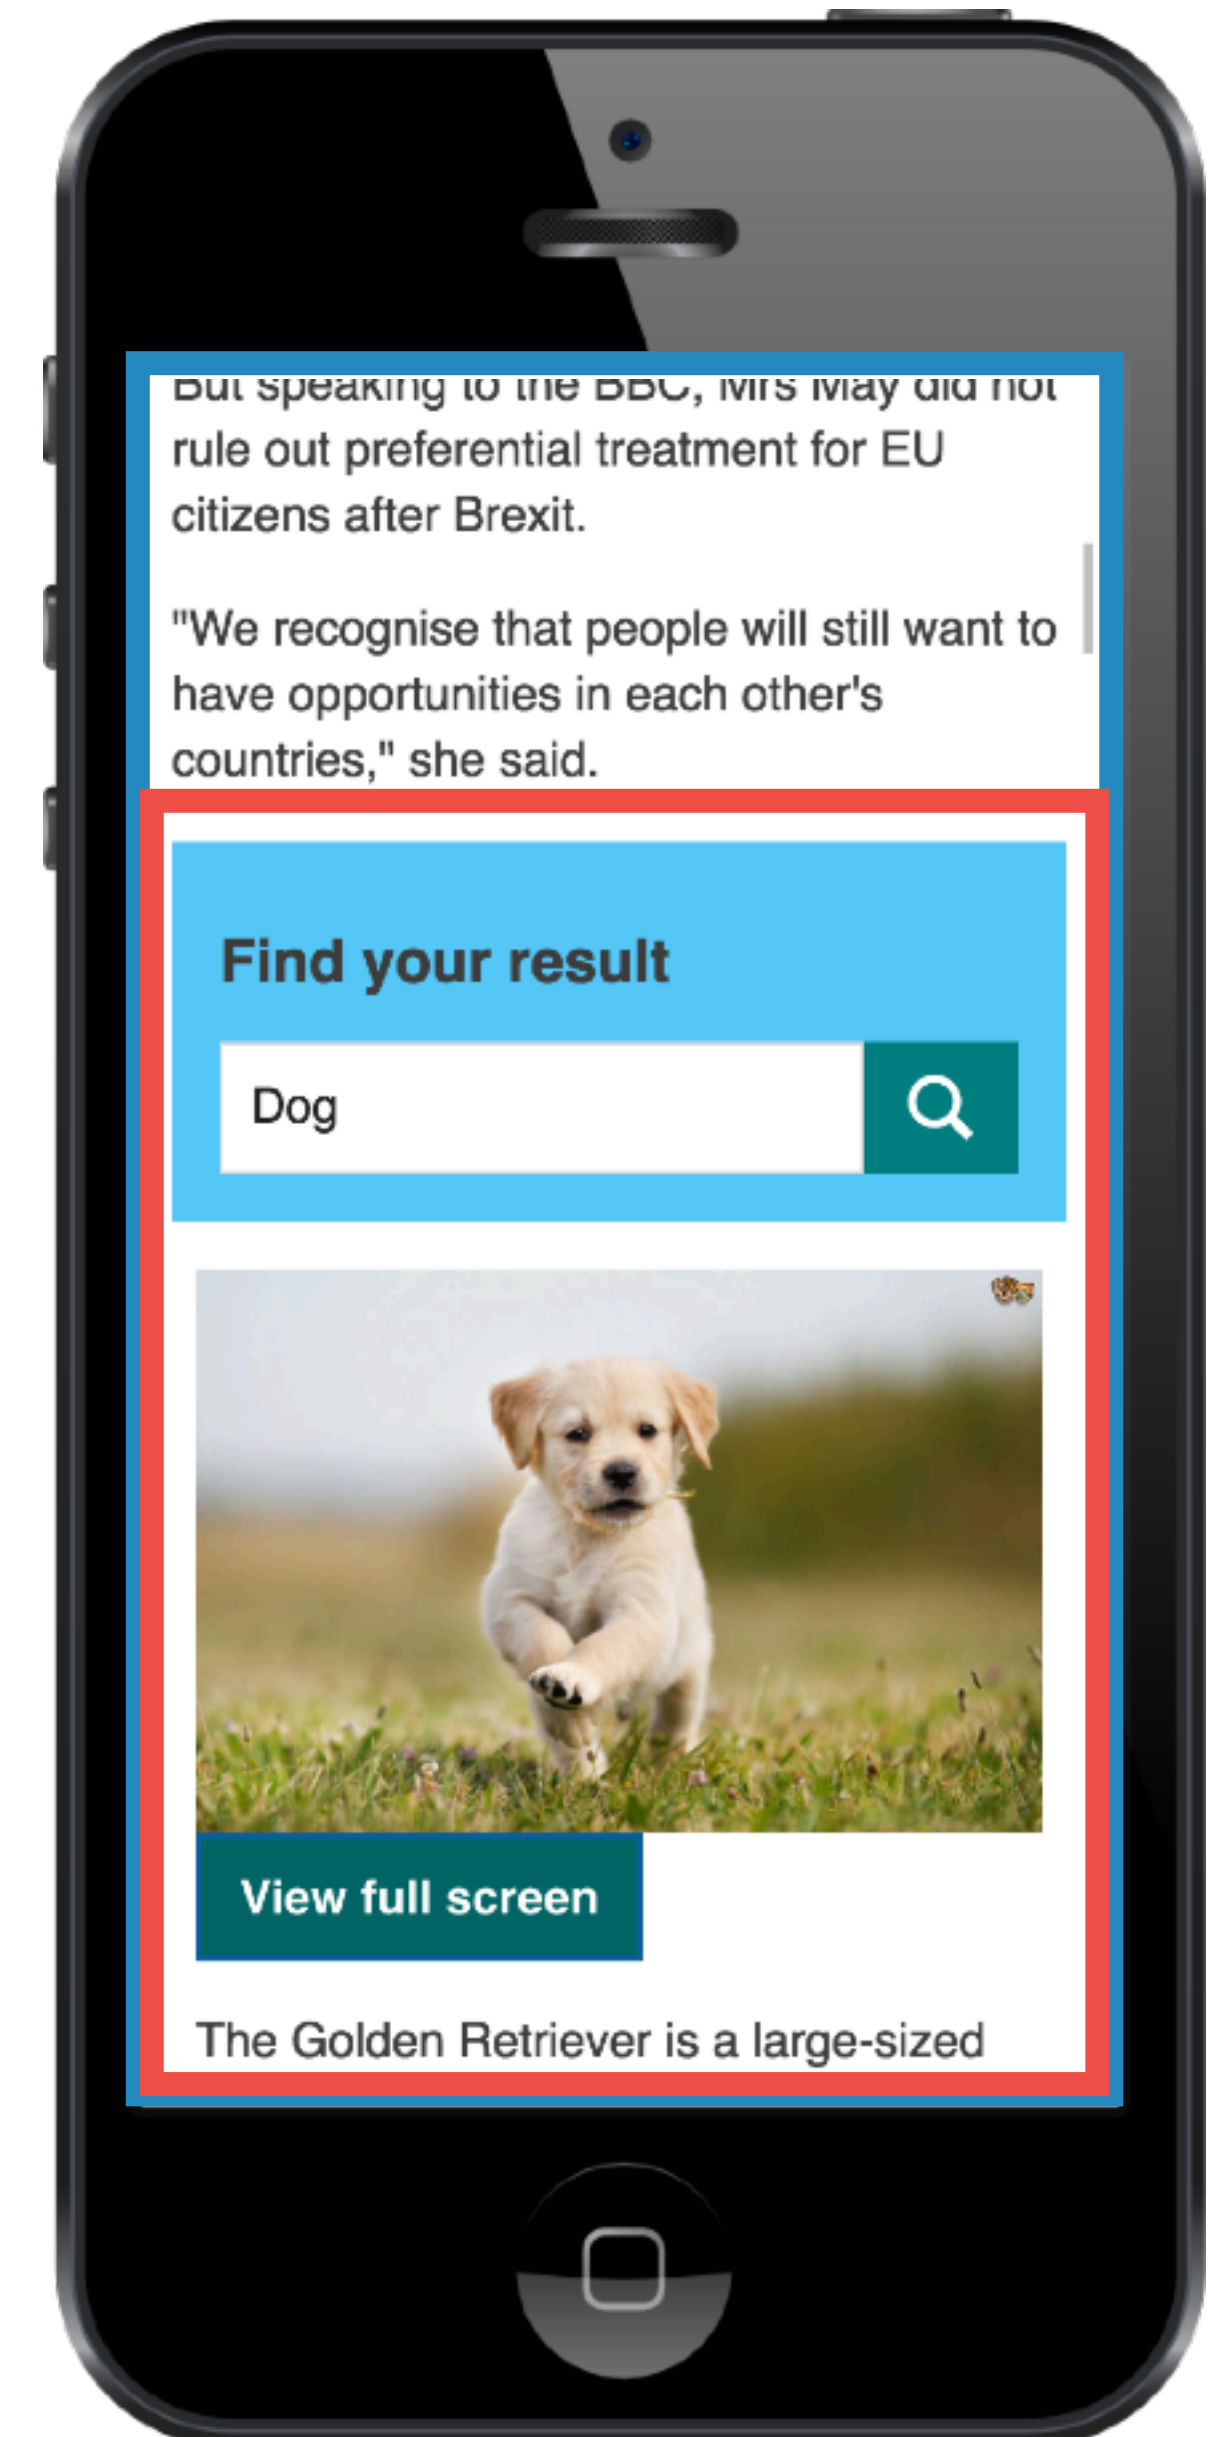

Host page

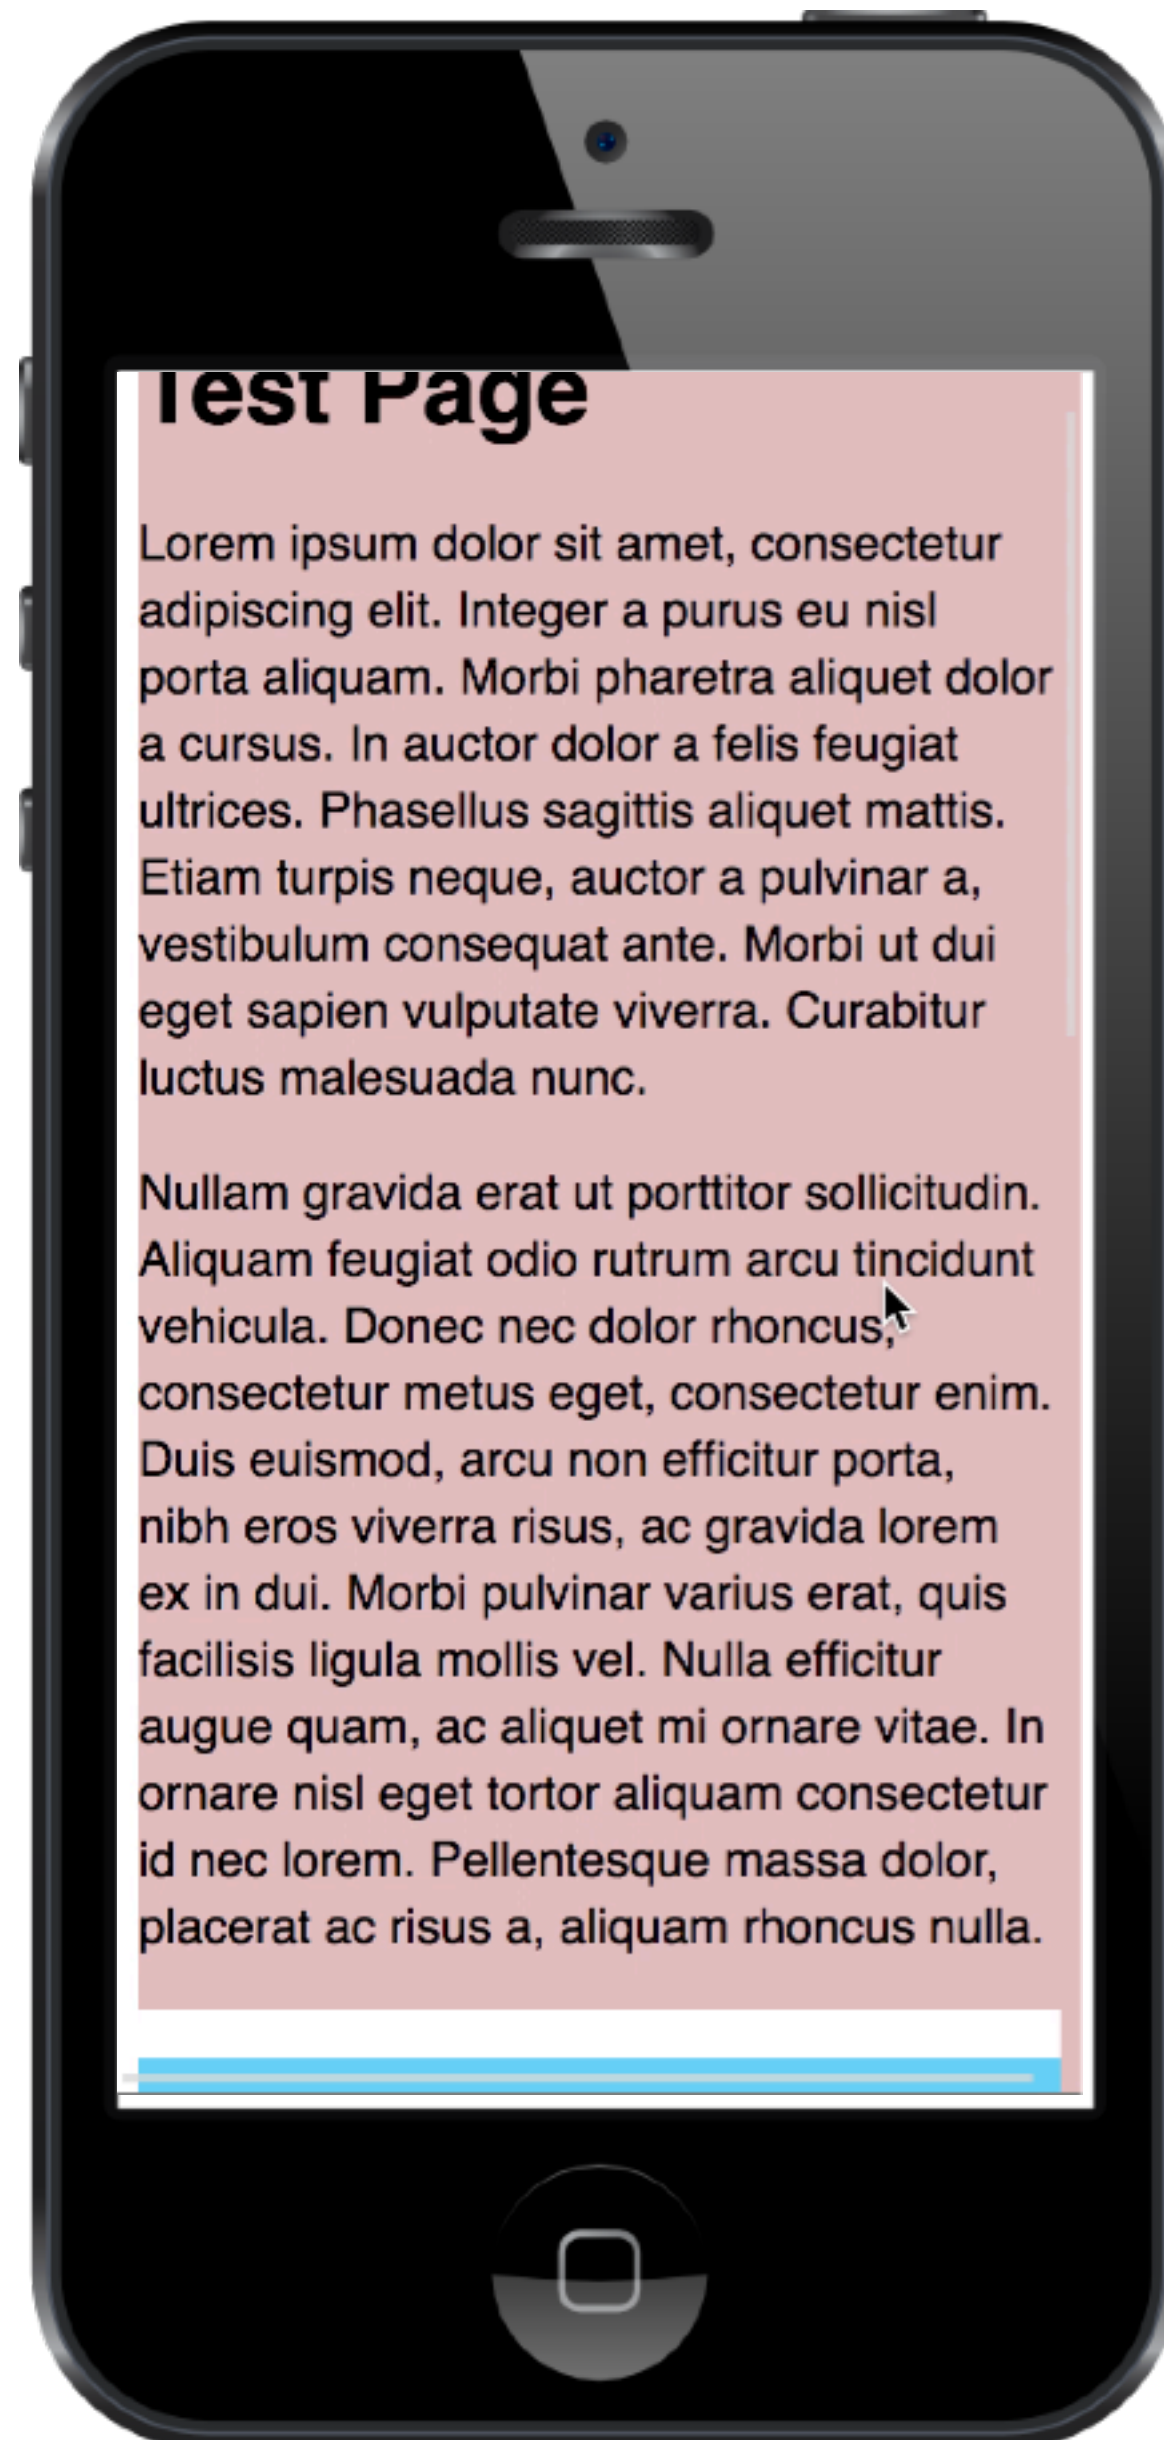

Application code

```
● ● ●  
  
if (isInsideIframe()) {  
    window.parent.postMessage({ name: 'window:toggleFullScreen' }, '*');  
}  
else {  
    document.body.className += ' fullscreen';  
}
```

```
● ● ●  
  
.fullscreen {  
    position: fixed;  
    top: 0;  
    left: 0;  
    right: 0;  
    bottom: 0;  
}
```

Shared CSS

- ▶ Full screen mode works now.
- ▶ So just the scrolling behaviour to fix
