

STANDARDS WILL CONTINUE TO EVOLVE

- ▶ It's all still HTML, CSS and JavaScript.
- ▶ New markups and APIs will provide the 'hooks' platforms need.

```
<script src="./fancy-application.js" is-essential=false></script>
```

FEATURE POLICY

- ▶ Perhaps 'Feature Policy' is the answer
- ▶ A bit like 'Content Security Policy' but for features
- ▶ Involves the *site* sending headers to opt into & out of browser features
- ▶ Currently a proposal: <https://wicg.github.io/feature-policy/>
- ▶ Check it out!
