

WE PROVIDE JOURNALISTS WITH A NAMESPACE

The image shows a content management system (CMS) interface. On the left, there is a text editor with a toolbar containing various formatting options like bold, italic, list, link, and image. Below the toolbar, there is a text area with placeholder text. At the bottom of the editor, there is a field containing the path `/include/visual-journalism/123-quiz` and an "Include" button. A blue arrow points from this path to a file explorer on the right. The file explorer shows a directory structure with folders and files. The path `123-quiz` is highlighted, and its contents are shown: `app.min.js`, `embed` folder, `index.html`, `wrapper.js`, `standalone` folder, `index.html`, and `wrapper.js`.
