

# EXPLORATION OF SUPPORTED PLATFORMS

A total of 16,119 property sales for £1m or more were completed last year, up 5.4% from the previous high in 2016.

Over the past decade, most were sold in London, but sales have doubled in the East of England - the biggest increase of any region in England and Wales.

University cities such as Cambridge and Bristol have seen £1m-plus sales surge.

Rising house prices and demand prompted by investment in these areas has pushed many properties' sale prices above the £1m threshold.

The findings are based on analysis by the BBC data team of Land Registry figures for England and Wales. The data does not cover addresses in Northern Ireland and Nldirect Land Registry does not make comparable data available. It also does not cover Scotland, where Registers of Scotland data is not free to download.
