

WHAT IF THIS...

```
if (isInsideIframe()) {  
  window.addEventListener('message', evt => {  
    const scrollPosCheck = evt.data.match(/scrollPos:(.+)/);  
    if (scrollPosCheck) {  
      respondToScroll(scrollPosCheck[0]);  
    }  
  });  
}  
else {  
  window.addEventListener('scroll', respondToScroll);  
}
```

...COULD BECOME THIS?

```
import wrapper from 'wrapper';

wrapper.onScroll(respondToScroll);

function respondToScroll(scrollPosCheck[0]);
{
}
});
}
else {
  window.addEventListener('scroll', respondToScroll);
}
```
